Medicaid

School-Based Services Program

Questions and Answers

What is the Medicaid School-Based Services Program?

The Michigan School-Based Services Program is under the direction of the Michigan Department of Health and Human Services. This federal School-Based program helps school districts by providing some reimbursement for medically-related services listed on a student's Individualized Education Program (IEP) or Individualized Family Service Plan (IFSP).

Note: Services are available to all eligible students with disabilities regardless of their Medicaid status.

Is there a cost to me to participate in the program?

There is no cost to the parent/guardian for IEP or IFSP specified services provided to children while they are at school.

Will participation in the program impact my family's Medicaid benefits?

Participating in the School-Based Services Program DOES NOT affect a family's Medicaid services, funds or limits. Michigan operates the School-Based Services program differently than the Family Medicaid program. The School-Based Services program DOES NOT affect your family's Medicaid Benefits.

What do I have to do to make sure my child's services are eligible for partial reimbursement through the Medicaid School-Based Services Program?

You must give written consent at the IEPT or IFSP meeting, granting your school district permission to provide services and bill School-Based Medicaid for the services. The consent form is usually presented to parents at the IEPT or IFSP meeting. You will need to provide your consent one time, which will not expire. If you decide to withdraw your consent, contact the local school building principal or the child's special education teacher or provider. You will receive annual notification of participation.

What type of services does the School-Based Services Program cover for children?

Social Work Orientation & Mobility
Speech & Language Occupational Therapy Physical Therapy
